

PR9148A Electric Vacuum Source

(Installation Instruction)

Built-in high-precision pressure sensor, The upper and lower limits of pressure can be set through the multi-function pressure controller, and the equipment can automatically generate pressure, which is the first choice for calibrating vacuum instruments.

Technical Parameter:

| Item | Parameter |
|-----------------------------|-------------------------|
| Pressure Range ^① | (-95 ~ 0)kPa |
| Stability | 0.02% F.S |
| Working Medium | Air |
| Output Interface | φ4 quick plug interface |
| Power Supply | AC220V |
| Dimensions | 160mm×320mm×500mm |
| Weight | 18kg |

① When the ambient atmospheric pressure is 100kPa.a (a : Absolute)

PANRAN instruments are available in South Africa from Intercal (Pty) Ltd
